

Newsletter March 2010

Short Code

Outlook Mobile Service

Send SMS messages from Outlook without downloading software. 2sms Outlook 2003 / 2007 / 2010 all support the ability to send SMS messages from Outlook without the need for any software add-in.

This solution is great to use if you have mobile phone numbers stored in Outlook, or if your organisation holds them on your email server. For set up information call UK on 0800 65 222 77 and in the USA on 977 276 7266.

Use a Short Code in your Marketing

Short Codes allow business customers to capture responses to their messages and forward them on to different destinations. Messages sent by the customer are sent from a 5 digit short code, and replies routed back to the customer. Users respond to campaigns by texting to the short code. They are charged at their standard network rate only. To set this service up or to get more information please contact your account manager or email support@2sms.com.

Customised Solutions

To meet customer demand, 2sms has created 2sms Software business. This solution provides customers with tailored applications. From branded sites, through to more specific services such as SharePoint SMS, or Voting Applications – all are developed to SMS enable existing solutions. If your business requires customised solutions enabling your system to send business SMS speak to our team now.
