

## Newsletter July 2010

امرحب

### Are you interested in sending SMS messages in Arabic or Chinese?

We can help. 2sms has implemented a service to support SMS messages written using non-Latin characters.

One Unicode text message can only contain 70 characters, therefore when sending messages longer than that using characters outside the GSM 7-bit alphabet, the charges will vary.

Call your account manager on **01234 757 800** to get the service set up and running on your 2sms account today.

### Archive sub-accounts

In response to a customer request, 2sms will be implementing a new account maintenance feature allowing master accounts to archive their sub-accounts. Unused credits will be credited back to the master account and the sub-account will be deleted from the list.

The new feature will be available as of mid July.

Contact [support@2sms.com](mailto:support@2sms.com) for more details.

### Did you know that...

You can set up a fixed message which can be used to quickly select regularly sent messages without the need to type them out each time.

Simply go to [www.2sms.com](http://www.2sms.com) and log in using your account details and follow these steps:

1. Select 'Fixed Messages' button
2. Type in the Fixed message
3. Click 'Add/Update'

This message will now be available from the drop down menu on the website, accessible when composing your SMS message.
