2sms Database to SMS Solution Overview

The 2sms Database to SMS solution is one of 25 software solutions that act as a bridge from your corporate systems to the SMS messaging network. Visit www.2sms.com/software for more information.

The Database to SMS application allows customers to access any ODBC compliant database to which they have access to extract mobile phone information. The Database to SMS application allows customers to access any ODBC compliant database to which they have access to extract mobile phone information.

Step 1 is to use the 2sms Database interface tool to define access to your ODBC compliant database. This process will then allow you to use this access to extract mobile phone numbers, and have them displayed in the SMS client software.
