

Virtual Number Hub

2sms launches a one stop shop for one of the largest number of international virtual long numbers for SMS MT and MO services.

You can have one account which can have multiple international virtual numbers attached to it.

Challenge

If you are a supplier of SMS services and your customer is a multinational who wants long numbers from multiple countries and you can offer some but not all of what they require, how do you meet the customer's needs?

Solution

1. Supply your own long numbers using your own SMS services
2. Subscribe to 2sms for the remaining countries
3. Choose MO only or MO/MT for the remaining countries
4. Connect using SMPP or XML
5. Features
 1. One account for all your needs
 2. DLR's supplied where available
 3. Single billing
 4. Ability to segment traffic to gain additional billing records so you can re-charge
 5. Access to stats via the 2sms online portal

Customer Doc # SAL-002 Issue	SAL-004
No./Date	1.0 09 June 2011
Classification	0

How it works

- 2sms has contacted the market, and signed up SMPP connections to a range of preferred suppliers.
- We have negotiated wholesale prices and optimised the provisioning process.
- We offer you a SMPP account. By formatting your Submit_SM PDU's correctly, you can set a MSISDN header for MT's.
- If you subscribe to a MSISDN, we will route MO's back to you via SMPP or XML.

Virtual Number List
